Advanced Vehicle Tracking from Cybit

1,500 Cybit customers remotely manage over 40,000 mobile assets, representing the UK's largest community of users. Fleetstar subscribers are drawn from some of the the UK's leading blue-chip organisations to customers managing small fleets of two or three vehicles.

Cybit's Fleetstar suite of products comprises of Asset Locator, Fleetstar Reporter and AVL. Designed and created in the UK, they are the most flexible on the market available at fixed monthly costs. Designed to be fully configurable and scalable, Cybit allows you to build on the core vehicle tracking system to add advanced components as your business grows or your requirements change.

Cybit works with a premier network of specialist partners that know and understand your requirements. They are best placed to consult with you to ensure you receive the most appropriate system for your individual business needs.

The Cybit difference can be found in:-

- Platform stability and scalability
- Customer service and aftersales support
- Fixed cost, fully inclusive managed service
- Regular product enhancements
- Success as a UK public company

21C

21C is the trading name of Property Hunt Ltd. We have over 50 years combined experience within the telematics and communications industry. We are a truly independent consultancy and we are proud of our ongoing partnership with Cybit.

Our company specialises in voice and data solutions, incorporating mobile, landline, vehicle tracking and data devices.

Our consultants will visit your premises, to analyse your company's current contracts and requirements. We will then present a bespoke communications review for your organisation, focusing on your current position and our recommendations.

This consultation will include a full demonstration of Fleetstar AVL vehicle tracking, and the benefits that this product could bring to your company.

What Our Customers Say...

C.H.N. HEATING & PLUMBING, MIDLANDS

“Fleetstar-Online will also prove instrumental in helping us to further improve our operational services and offering to clients”.

TRUCTYRE FLEET MANAGEMENT

“We have been delighted with Cybit’s Fleetstar-AVL solution.

The easy to use system presents vital vehicle information that has been key to optimising our fleet operations. We have experienced an excellent level of customer support throughout our time with Cybit and feel that we have brought a complete service – not just a product!”

AMV HAULAGE

“There are so many aspects of our business that Fleetstar has enhanced! As a haulage company it is essential that we know where our vehicles are at all times – Fleetstar provides this information when we need it! Real-time traffic updates allow us to give our customers precise ETA’s. The ability to monitor driver routes means we can minimise unnecessary journeys and reduce our fuel costs.”

B PRICE LTD

“Cybit’s Fleetstar solution is the ideal tool for total fleet management! It is important in the construction industry to monitor how long our employees spend on site, and with Fleetstar we are able to do this with the click of a button! The detailed and summary reports that the system produces have enabled us to increase vehicle productivity through streamlining our operations and eliminating unnecessary or repeat journeys!”

BIRMINGHAM MOTOR TYRES (BMTR)

“We have a growing fleet of service vehicles which attend call outs across the UK so the total visibility that Fleetstar provides is ideal! Having access to live and historical data any time anywhere allows us to monitor driver hours and enhance our Duty of Care compliance.”

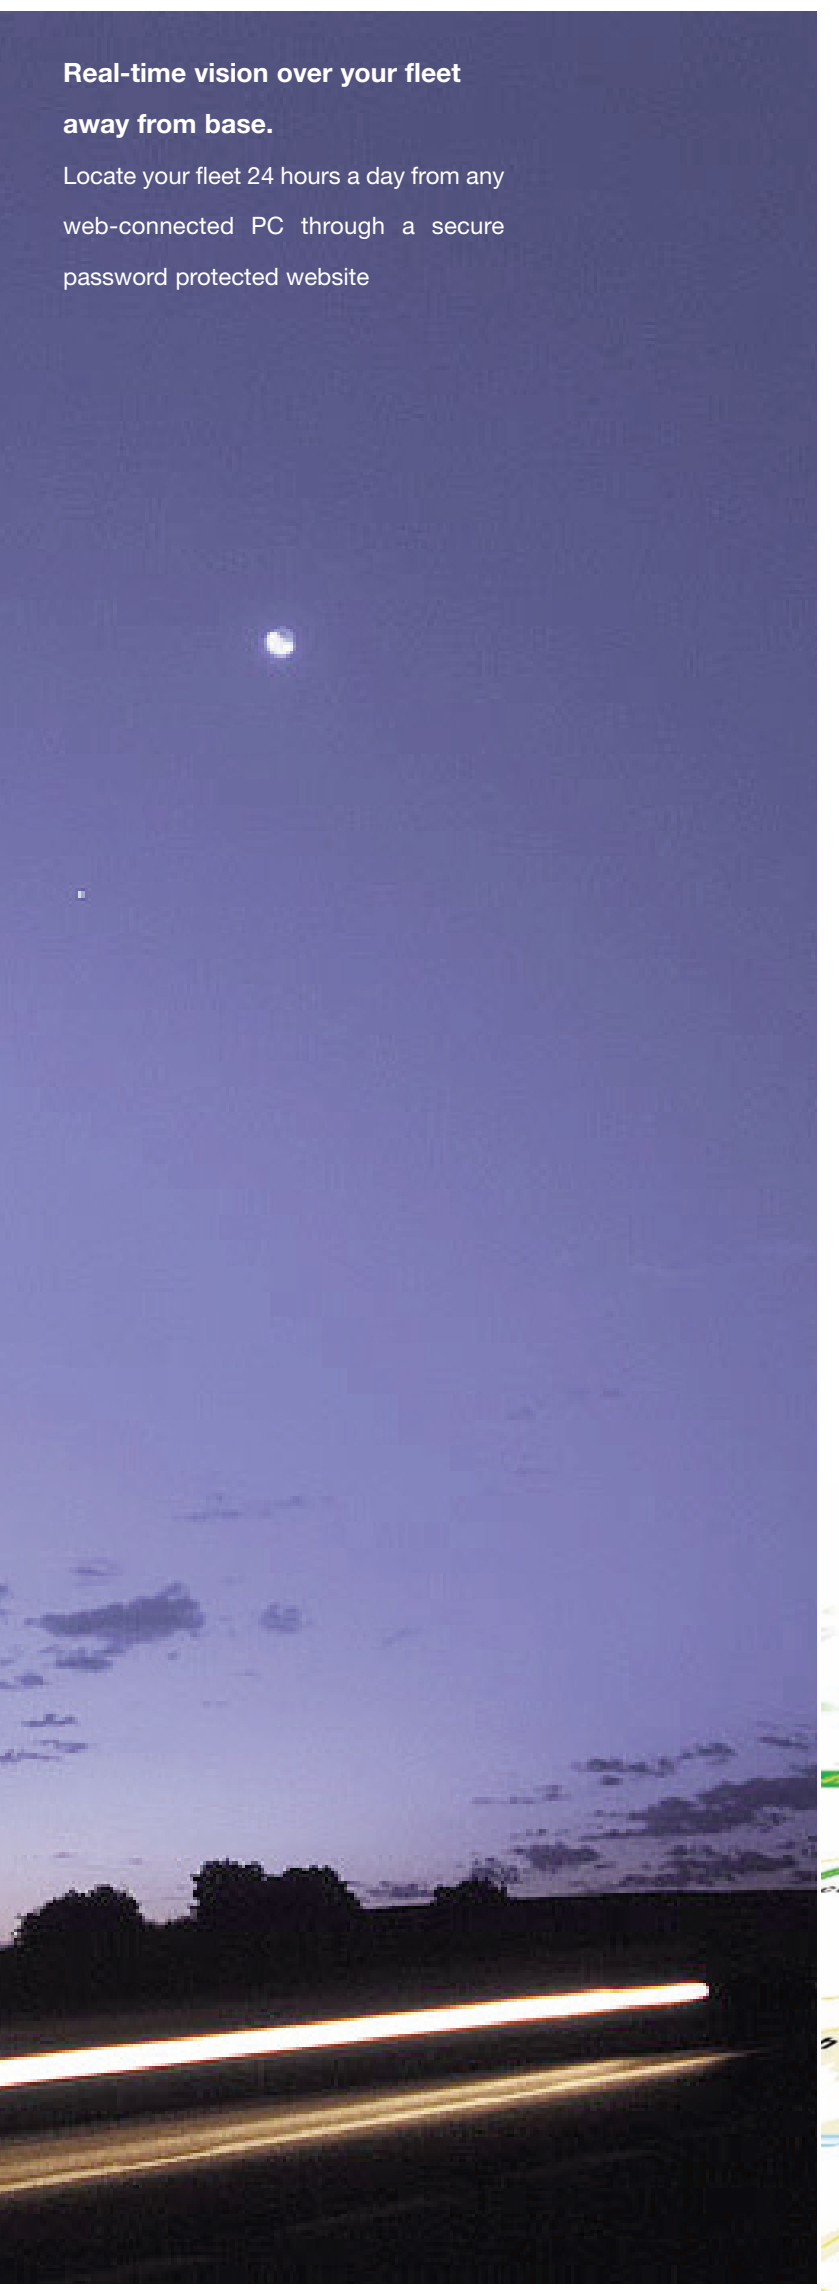

Wessex Petroleum

Cybit's Fleetstar gives us added protection and security on the high-value, high-quality fuels we deliver. Fleetstar has added value across all aspects of our business. Cybit's fleet tracking comes highly recommended!

**Real-time vision over your fleet
away from base.**

AssetLocator™

Fleetstar Asset Locator

Entry-level on-line vehicle tracking

Asset Locator is our 'Track and Trace' solution specifically designed to manage the movements of your fleet. Asset Locator gives high-level visibility on street level mapping for more effective management of your mobile resources.

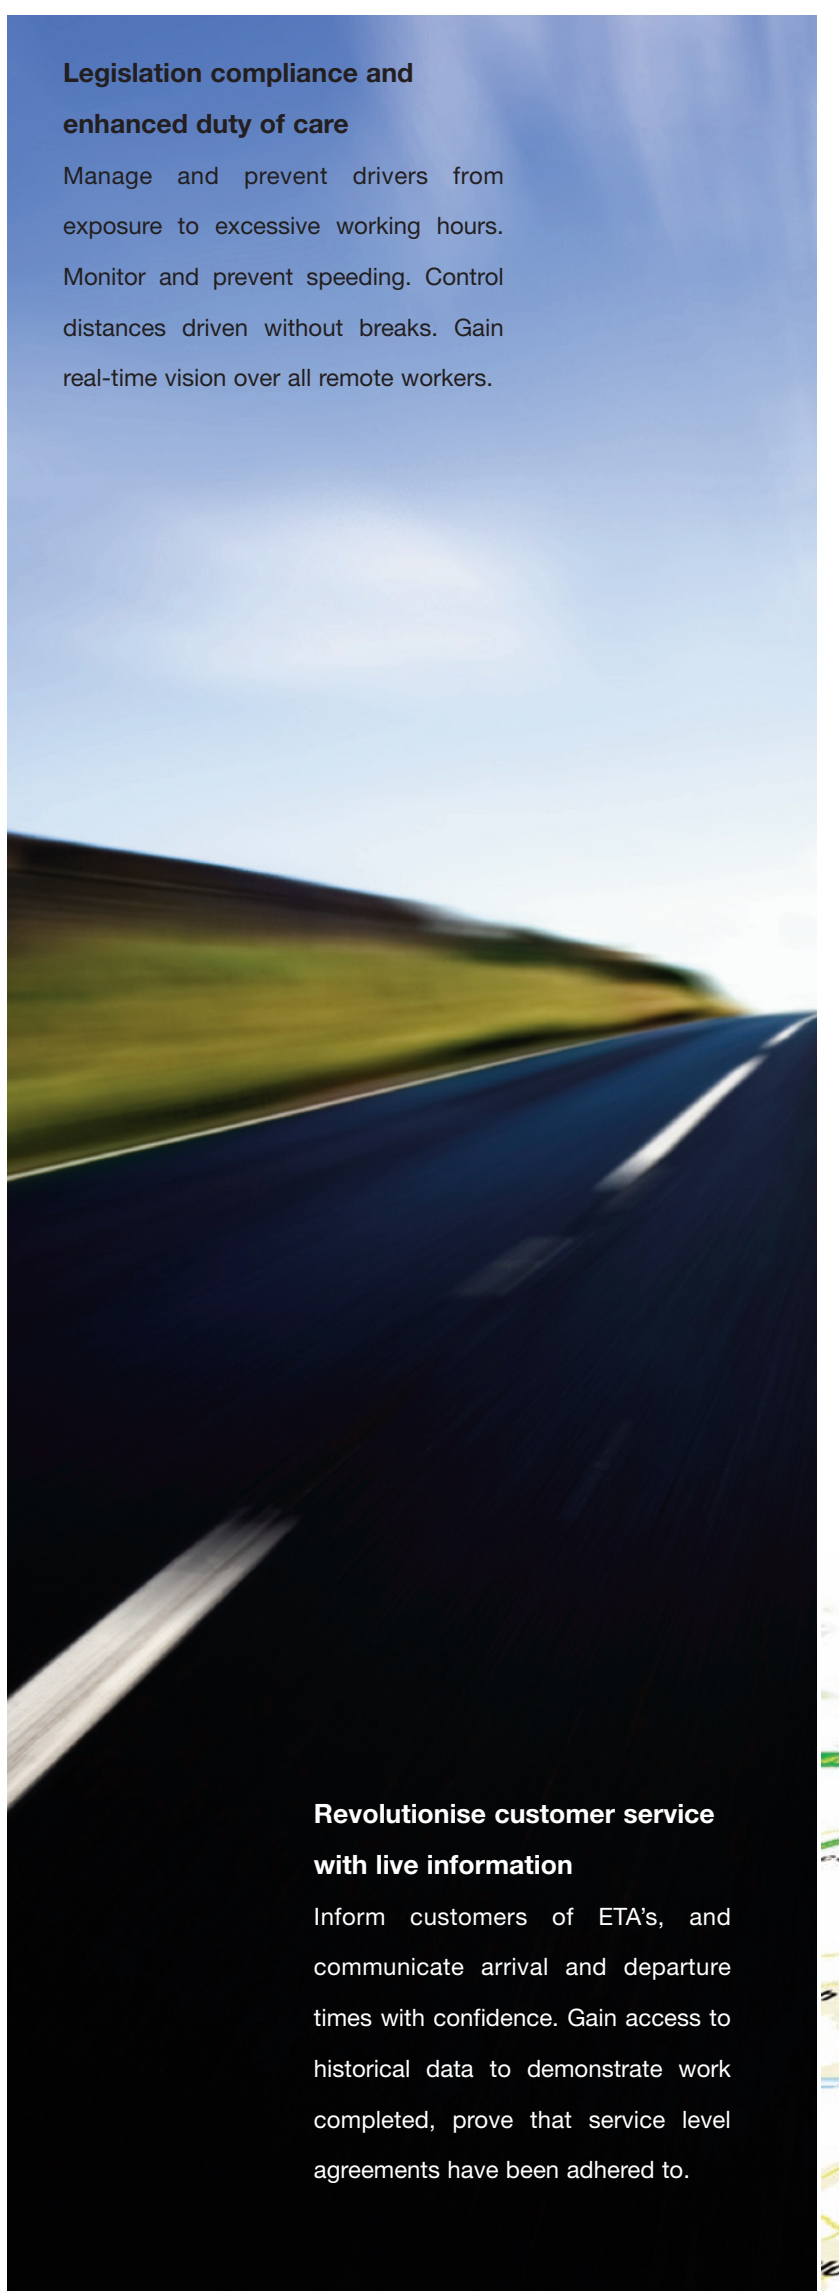

Asset Locator has a first-class range of configurable reports that are easy to use yet extremely comprehensive.

This product is best suited for companies that utilise vehicles, plant or machinery away from base for an extended period of time, but do not need minute-by-minute updates and want a simple to use cost effective solution.

- User friendly & highly secure
- View all asset locations on quality Navteq maps
- Historical data stored and easily accessed for analysis
- Locations such as depots, operating sites and customer premises can be imported onto the map

Legislation compliance and enhanced duty of care

Manage and prevent drivers from exposure to excessive working hours. Monitor and prevent speeding. Control distances driven without breaks. Gain real-time vision over all remote workers.

Revolutionise customer service with live information

Inform customers of ETA's, and communicate arrival and departure times with confidence. Gain access to historical data to demonstrate work completed, prove that service level agreements have been adhered to.

Fleetstar Reporter

Cost Effective, Simple to Deploy, Live Vehicle Tracking

Fleetstar-Reporter is an easy to use internet-based application designed to provide core vehicle location information.

Fleetstar-Reporter presents key data in ways that allows busy managers to monitor at a glance their mobile workers and drivers.

Designed to grow with your business, Fleetstar-Reporter is a highly scalable solution allowing easy upgrades as your requirements develop. This is the right system for a company looking to access new technology without making a large investment and require a product that can be easily upgraded as usage becomes more advanced.

- Detailed location, timesheet and journey reports
- Management reports emailed direct to your inbox
- Highly accurate street level mapping
- Vehicle data captured every 20 seconds
- Simple to view data to validate overtime and timesheets

**Operational efficiency &
cost control through remote
worker visibility**

Limit timesheet abuse through easy access to actual start and stop times, monitor and change drivers taking longer routes to destinations, verify overtime payments are correctly applied, enhance the management of resources with live information

Fleetstar AVL

Advanced Vehicle Locator for SME's

Fleetstar-AVL provides key features including real-time GPRS based tracking and a comprehensive reporting suite. Capturing live location based information every 20 seconds for highly accurate reporting and performance measurement. Fleetstar-AVL is an ideal tool for refining and managing business processes to help reduce costs and maximise efficiency.

Fleetstar AVL includes, as standard, a live dynamic timesheet that gives you total vision of your employees and their activity levels from one screen. This feature enables you to have a bird's eye view of your operation throughout the day.

- Manage your fleet from one screen
- Extensive powerful reporting suite
- Enhanced duty of care and legislation compliance
- Operational efficiency & cost control through remote worker visibility
- Productivity increase through dynamic management
- Legislation compliance and enhanced duty of care
- Revolutionise customer service with live information
- Monitor performance against KPI's

Emailed Reporting
